

# OBERON LIBRARY PRESENTS

# ANDREW SKEOCH

# DEEP LISTENING TO NATURE

Andrew Skeoch is a professional wildlife sound recordist who over the last thirty years has travelled widely to capture the sounds of the world's remaining wild places. In his new book, *Deep Listening to Nature*, Andrew not only takes the reader to remote locations to eavesdrop on exotic wildlife but guides us in how to become a listener to nature around us.

Andrew offers a unique multi-media presentation, a narrative of ideas with fascinating recordings of birdsong and nature sounds. With an immersive weaving of evocative recordings, fascinating spectrogram analysis and original ideas, you'll hear the environment around you in a whole new way.
