

## **CERTIFICATE OF ANALYSIS**

Work Order	: WN2010094	Page	: 1 of 3	
Client		Laboratory	: ALS Water - Newcastle	
Contact	: Water Oberon	Contact	: Andrea Swan	
Address	: 137-139 OBERON STREET OBERON NSW,AUSTRALIA 2787	Address	: 5/585 Maitland Road Newo	castle West NSW Australia 2304
Telephone	:	Telephone	: +61 2 4014 2500	
Project	: OBERON WASTE WATER	Date Samples Received	: 05-Nov-2020 08:50	ANULUI.
Order number	: 12152	Date Analysis Commenced	: 02-Nov-2020	
C-O-C number	:	Issue Date	: 11-Nov-2020 10:43	
Sampler	: Andrew Krol			HAC-MRA NATA
Site	:			
Quote number	: WN Blanket Quote			Accreditation No. 825
No. of samples received	: 4			Accredited for compliance with
No. of samples analysed	: 4			ISO/IEC 17025 - Testing

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. This document shall not be reproduced, except in full.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

Additional information pertinent to this report will be found in the following separate attachments: Quality Control Report, QA/QC Compliance Assessment to assist with Quality Review and Sample Receipt Notification.

## Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Craig Glover	Microbiological Supervisor	Microbiology, Newcastle West, NSW
Neil Martin	Team Leader - Chemistry	Chemistry, Newcastle West, NSW

## **General Comments**

The analytical procedures used by ALS have been developed from established internationally recognised procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are fully validated and are often at the client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Where a result is required to meet compliance limits the associated uncertainty must be considered. Refer to the ALS Contact for details.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

^ = This result is computed from individual analyte detections at or above the level of reporting

ø = ALS is not NATA accredited for these tests.

 $\sim$  = Indicates an estimated value.

- Sample 004. Thermotolerant coliform result is estimated due to the high number of non-target colonies present. Result may be underestimated.
- Sample 004 The LOR has been raised for this sample due to dilutions because of turbidity or non-target organisms at higher volumes, or a history of.

## Analytical Results

Sub-Matrix: WATER (Matrix: WATER)			ent sample ID	ExPond Works Discharge EMP1	Up-Stream EMP3	Down-Stream EMP4	ExPond Works Discharge EMP1	
	Client sampling date / time			02-Nov-2020 09:15	02-Nov-2020 09:00	02-Nov-2020 09:30	02-Nov-2020 10:15
